DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 39,41,42, 65 and 73 are rejected under 35 U.S.C. 103(a) as being unpatentable over Howling et al.

Howling discloses a method comprising providing a sheet material having a wet pulp state; and applying to said sheet material while said sheet material is in said wet pulp state a pattern, wherein said sheet material comprises paper and a foil (comprising a transparentizing resin) and said applying comprises applying said pattern to said foil, wherein said pattern of is at least partially applied to said foil as a printed image;

Howling lacks the disclosure of a pattern comprising a PEDT/PSS.

It would have been obvious to a skilled artisan to provide the method of Howling with the step of using a PEDT/PSS since no new or unexpected result would occur from this

Art Unit: 3722

substitution. Further, the various combinations and locations of elements claimed would have been obvious matter of design choice to a skilled artisan. Hence it would have been obvious to one having ordinary skill in the art at the time the invention was made to locate the elements in any location relative to each other since it has been held that a mere reversal of the essential working parts of a device involves only routine skill in the art. *In re Einstein*, 8 USPQ 167. It appears that there would be no new or unexpected result from such a modification.

Allowable Subject Matter

Claims 66-67 are allowed.

Claims 43-48, 62-64, 68-72, 74 and 75 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3722

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
